RAHGIRI: SPREADING AWARENESS

ARAVALI SPEAKS

OUR ONE VOCAL STEP TOWARDS AWARENESS THROUGH RADIO SHOWS AND PODCAST

➤➤➤ RADIO SHOW WITH "MANAV RACHNA 107.8 FM"

A voice has an ability to shape human experiences and expressions. Accompanying the imaginations of thousands of listeners, a radio has the power to unite communities. While Radio Manav Rachna traverses with a variety of melodies & stories, **Mr. Pankaj Grover, Mr. Jitin Tanwar, Ms. Maanyaa Gupta, Ashvini Deshpande Ji** and **Mr. Aakash Bansal** from Save Aravali Trust was pleased to join these stories while marking one of its kind radio-sessions.

A team from **Manav Rachna 107.8 FM** approached Save Aravali Trust, while rewarding us an opportunity to be the voice of the great Aravalis, and to represent the hopes of volunteers of the Aravali ecosystem. It was sooner, the people realized the positive power of radio framing the spectrum of thoughtful discussions.

RECORD BREAKER

This accomplishment was recognized with the addition to **Asia Book Of Records** and **India Book Of Records** for being the Longest Radio Session ever held dedicated to environment centric discussions.

➤➤➤ PODCAST WITH "THIS DAY"

Save Aravali Trust was delighted to be a podcast speaker on This Day video series "Spotlight". An interview series that features experts talking about culture, history and heritage of Bharat.

The speaker of the podcast was our **Head of Community Engagement and Partnership, Mr. Pankaj Grover** who became the face of all the volunteers for environment, speaking on various topics such as Aravali: Conservation efforts and its challenges, its history and significance for Delhi-NCR.

WET WASTE MANAGEMENT

OUR MISSION TO TRANSFORM THE
ECOLOGY OF SOIL OF ARAVALIS THROUGH
ORGANIC COMPOSTING

>>> THE INITIATORS

Wet waste is often overlooked, but we see its potential to make a big difference. Through this program, we're processing wet waste and turning it into valuable fertilizers, enriching the soil in the Aravali forest lands. Not only does this reduce the pressure on landfills, but it also nurtures a healthier ecosystem with thriving vegetation. At Save Aravali Trust, our dedication to environmental conservation knows no bounds. We're excited to introduce our latest initiative, **Wet Waste Management**, led by our passionate leaders, **Mr. Vikas Thareja** and **Mr. Raju Rawat**.

>>> THE IDEA !!

Wet waste management, also known as organic waste management, refers to the proper handling and disposal of biodegradable waste materials that are typically moist or wet in nature. We're urging households to collect their kitchen waste, diverting a significant portion away from the Bandhwari landfill yard at Faridabad. Effective wet waste management is essential to reduce environmental pollution, promote sustainability, and prevent the release of harmful greenhouse gases. By encouraging waste segregation at home, we're taking a significant step towards creating cleaner and greener Aravalis.

OUR APPEAL

"Be a part of solution, not pollution because if you litter the future will be bitter. Thanks to the unwavering support of individuals like you who believe in the power of positive change. However, our work is far from complete, and we need your support to continue making a meaningful impact."

>>> ALL WE SEEK IS YOUR SUPPORT

Save Aravali Trust's unwavering commitment to new initiatives like Wet Waste Management reflects our ongoing dedication to environmental betterment. With each project, we inspire change, showing that every effort, no matter the size, contributes to a more sustainable future for the Aravali region and beyond.

Join us in our mission to transform waste into green hope!

As we look to the future, we remain unwavering in our vision to conduct more plantation drives and expand our green footprint. The need for reforestation and environmental protection has never been more pressing, and together, we can create a sustainable and harmonious coexistence with nature. Let us continue to plant the seeds of a greener, healthier planet, one tree at a time. Together, we can make a world of difference.

A Glimpse

into the hard-work poured by volunteers over these months and creating a positive impact on the #Aravali ecosystem.

PLANTATIONS

Save Aravali Trust, committed to the cause of environmental conservation, has been at the forefront of reforestation efforts in the Aravali region. With over 15 plantation drives conducted this season alone and wide variety of native saplings added to our green tapestry, the trust's impact is nothing short of remarkable. These efforts have resulted in the transformation of 5 acres of land into a flourishing green patch, breathing life into the Aravali landscape.

Some of our forest treks & plantation drive collaborators were -

- Brahmakumaris
- DAVIM
- Protsahan Charitable Trust
- J.C. Bose University, YMCA
- Aggarwal College, Ballabhgarh
- Manav Rachna Institute

We understand that the road to a greener future is a collective endeavor. It is heartening to see these groups joining hands with us in these plantation drives

CSR EVENTS

We extend our heartfelt gratitude to all the corporates and groups who have stood by our side in this noble mission. Their support, dedication and hard work have played an integral role in bringing about positive change.

Organisations like -

- SBI, RBO-3, Gurugram
- Rhenus Logistics
- Rotary Club of Delhi South Central
- Marelli Talbros

underscores the importance of community engagement for the benefit of environment.

The benefits of tree planting are manifold and undeniable. Trees serve as the lungs of our planet, absorbing carbon dioxide and releasing oxygen, thus improving air quality and combating climate change. They provide vital habitat and sustenance for countless species of wildlife, promoting biodiversity & preventing soil erosion.

THE BROAD LEAVES EXPERIMENT

Save Aravali Trust has always been a steadfast champion of environmental conservation. Over the years, our plantation drives predominantly featured thorn plants like Desi Keekar and jungle jalebi. However, a recent transformation in our approach has shown our unwavering commitment to innovation and progress.

In this pioneering move, we've initiated a pilot project by planting 50 broad-leaf plants on a negligible budget. Led by our dedicated volunteer, **Kavita Ji**, an environmental scientist, we've carefully selected saplings and designed suitable pits for plantation. Our choice of plant species is the result of extensive research.

➤➤➤ WHY BROAD-LEAF PLANTS?

Because they offer diverse advantages. They foster biodiversity by providing shelter and sustenance for various wildlife species and are formidable carbon sequestrator, aiding in the fight against climate change.

One of the primary reasons for the success of angiosperms is their highly efficient reproductive system. They produce flowers, which often attract pollinators like insects, birds, and bats. This method of reproduction is more reliable and efficient compared to the wind-based pollination of many gymnosperms. The use of animals as pollinators increases the chances of successful fertilisation, leading to more consistent seed production.

➤➤➤ KAVITA JI: A WOMEN WITH A VISION

The project is being led by our **Environmental Scientist, Kavita Ji** along with the support of our ground operations leaders **Mr. Yash Ji** and **Mr. Raju Ji**. There were several complex steps involved during the initial stages of soil and pits preparations. Kavita Ji's transformative initiative was launched to cultivate a forest patch within the Aravali region, utilising native broad leaf species, totalling approximately 50 plants.

Her innovative vision and unwavering determination have played a pivotal role in the inception and ongoing sustenance of this remarkable project. Through her scientific acumen and commitment to preserving indigenous biodiversity, Kavita ji has set a commendable example for conservationists and environmentalists alike.

RAHGIRI SPREADING AWARENESS

Rahgiri - Embrace the Streets, Ignite Change!

A dynamic and vibrant awareness campaign, invites you to embark on a transformative journey that promises to reshape our streets, communities, and lifestyles. This initiative aims to empower individuals and communities to reclaim public spaces, promote active living, foster social inclusion, and raise environmental consciousness. Our campaign was dedicated to raising awareness about the urgent need for environmental conservation and inspiring individuals to take action to safeguard our planet.

Rahgiri for Nature Conservation is more than just a campaign; it's a call to action for individuals, corporates and communities to come together to protect the environment we all share. By participating in Rahgiri events and embracing sustainable practices, we can make a positive impact on the planet, ensuring a healthier and more sustainable future for generations to come. Let's unite, celebrate nature's wonders, and work together to preserve the beauty of our planet.

SOWING THE SEEDS OF CHANGE

The Human Resources (HR) department plays a pivotal role in organizations, and its importance cannot be overstated. The Human Resource department is essential for attracting, developing, and retaining talent, fostering a positive workplace culture, and aligning human capital with the organization's strategic goals. Its multifaceted role makes it a critical component of any successful organization.

MEET THE TEAM

Introducing (top to bottom) **Minaxi Sharma Ji**, **Maninder Singh Johar Ji** and **Krishna Rawat Ji**. They are the workforce behind the HR operations and coordination of the Save Aravali Trust.

VOLUNTEER ONBOARDING WORKFLOW

With the advancement in technology, HR team take charge of a new volunteer joining with ease. The process is as simple as eating a cake. Just go to our website (www.savearavali.org), navigate to become volunteer page, fill the form. That's it. You'll get a call from our HR team.

But how do they do it ? How they manage such huge data ?

The required data is captured from the website and transferred to our in-house VMS (Volunteer Management System) cloud based software. Here we have all the required modules to handle the informations of all our volunteers. This way we are able to track and perform volunteer based HR operations seamlessly. From calling you for the first time to inducting you in Save Aravali Trust to assigning you in a team with roles and responsibilities, the HR Team is involved and be at your side during every step to make you feel comfortable and confident.

YOU CAN BE A LEADER TOO

At Save Aravali Trust, we believe that leadership knows no boundaries. We invite you to step into the spotlight and become a leader in our community through our exciting NGO opportunities. Our mission is to empower individuals like you to drive positive change, make a lasting impact, and be a beacon of hope for conservational efforts towards Aravalis.

Join Our Team, Lead Initiatives, Advocate for Change and Create Significant Impact

Because Leadership is not about holding a title; it's about making a positive impact on the lives of others and the world we live in. We invite you to be a leader, to seize the opportunity to drive change, and to inspire hope. Together, we can create a greener future for all. To learn more about opportunities we offer and how you can become a leader, visit our website or contact us. Your leadership journey begins here!
